

VoIP

VoIP stands for Voice over Internet Protocol, it is the new and future way that our telephone lines and calls will be delivered to our homes and businesses.

Once you have connected to the B4RN full fibre broadband it makes no financial sense to retain a landline. Your broadband can be used for phone calls, free if connecting to another VoIP phone, or if calling to a landline it's only the cost of a local call at the receiving end, even for international calls.

The router supplied by B4RN the Zyxel BE92 has 2 telephone connections. These can be used for your standard analogue phone (you may need an adapter), some mobile phones also allow internet calling. Several companies offer VoIP services i.e. Vonage, Sipgate, Draytek, and CircleLoop and local companies Centurion and UBC

These are on a contract or a pay-as-you-go service (where you buy advance credit for your calls). The pay as you go services will require a new number.

B4AV have arranged discounted VoIP service with a local North East company, Unified Business Communications at £6.95 + vat per month. This service allows you to transfer your existing telephone number An application form is available below

If you wish you to keep your existing telephone number make sure you do not cancel your existing phone service until after you have your fibre broadband up and running and your telephone number to your VoIP service

VoIP from UBC

Licence Only is £6.95 per month + vat. including 2000mins per month call bundle to landlines and mobiles

This provides you with 2000mins of calls to landlines (01/02) and mobiles (O2, 3, V, EE) voicemail, call groups, call forwarding and divert, company phone book, music on hold, time-base routing, call barring, performance reports

based on 2-year fixed price contracts.

If you would like a phone these are a selection **Yealink Handsets**

Yealink T19p @ £55.00 each + vat

These are the entry level or basic handsets

Yealink T23G @ £65.00 each + vat

These are Gigabit speed phones with 3x Programmable keys, a more executive model

Yealink T27G @ £77.00 each + vat

These are Gigabit speed phones with 6x Programmable keys.
The phone can support an expandable unit with up to 38x programmable keys
Like a receptionists phone.

Yealink WS2P Cordless @ £95.00 each + vat

These are cordless DECT handsets with a VoIP Base unit. They act and cover a range similar to those of current cordless phones.

If you wish to include the handset in the monthly charge then the contracts would have to be 3-years at £8.95 +vat per month including basic handset and PSU, £9.95 per month for the Executive model +vat

Other more advanced handsets are available at varying costs ideal for business users. If the business requires more than 10x handsets then we would recommend a site survey as it may be cheaper in the longer run to put a small VoIP system. *Other services and equipment are available including full business systems please email for details.*
